SOLE PROPRIETORS AND MANUFACTURERS OF

Holt's Patent Ribbon Hand Stamp.

The annexed cut represents an improved Hand Stamp or Dating Machine, to which we would respectfully call your attention, as possessing many advantages over any other machine for a similar purpose, viz., Rapidity of action, compactness, clearness of impression, and symmetry of form. A chemically prepared silk ribbon furnishes the coloring matter, which will never dry, evaporate, or gum up—thus avoiding the unpleasant necessity of ink, pads, bottle, brush, etc., and is always ready for use.

Each ribbon will give full 30,000 impressions, when it can be easily drawn out, unhooked, and a fresh one inserted.
