

The Progression Of The New York Foreign Mail Cancellation 1870–1878

ORIGINS AND HISTORY of the New York Foreign Mail Cancellation

New York Foreign Mail (NYFM) cancellations were designed for use in the Foreign Mail Department of the main New York City Post Office. They were first identified by J. Murray Bartels in 1926 as, '... attractive cancellations used in New York City from 1870 to 1876 on outgoing foreign mail'. This was later qualified by William R. Weiss, Jr in 1990 as, '... a group of cancellations usually applied to mail which usually originated in New York City and was usually destined for a foreign country (other than Canada)'.

THE AIM of this exhibit is to plot the chronological progression of cancellation designs used in the Foreign Mail Department 1870-1878. This ground-breaking treatment reveals the emergence of four categories (which, for convenience, are each assigned a colour which is replicated throughout the exhibit).

- **a) 1870 to 1871:** the predominance of **grid and wedge** cancellations
- **b) 1871 to 1873:** the introduction and predominance of **basic fancy** cancellations
- **c) 1873 to 1875:** the predominance of the **classic intricate fancy** cancellation
- **d) 1875 to 1878:** the progressive decline of *all* handcarved designs with the **inception of the Universal Postal Union (U.P.U.)** on 7/1/1875 and the introduction of the **steel duplex** cancelling device (first recorded use in the Foreign Mail Department being in Jun1876)

CHRONOLOGICAL PRODUCTION OF 170 N.Y.F.M. CANCELLATIONS

NUMBERS OF RECORDED CANCEL DESIGNS

After extensive research the exhibitor believes there currently exist **170** distinctive NYFM cancel designs. He illustrates **147 (86%)** of these with emphasis on the **classic intricate fancy** cancels which so became the hallmark of the period **where 50 of the recorded 54 (93%) are shown.**

MATERIAL DISPLAYED

The exhibit shows a comprehensive range of on cover NYFM usage such as supplementary mail (a system to expedite shipping), mail originating outside of New York City yet attracting a NYFM cancel (2-5), or leaving New York by train (rather than ship) for transit via San Francisco, New Orleans or El Paso (7-16); postal cards, stamped envelopes, dual and triple country frankings (7-7) & (8-15) respectively, advertisement (7-4), propaganda (7-15) and steamship usage (5-6). Also shown are the only recorded shipwreck cover (1-13), a previously unrecorded cancel design (3-7), a cover bearing two different intricate fancy cancels simultaneously (7-6) and the only recorded Wells Fargo cover originating in Mexico (7-10). Rare destinations with two or less recorded, include Panama (2-14), Rumania (3-1), Malta (4-6), Uruguay (6-10), Venezuela (7-5), Tunisia (6-14), and Columbia (8-4).

DATES FOR CANCELLATION USE (shown immediately below cancellation tracings) and numbers of recorded covers can change as new material emerges.

Exchange Office datestamps, where indistinct, are replicated as originally intended where space allows. Generally coloured red and applied exclusively in the Foreign Mail Department, they show dates of departure from New York.

Significant covers showing 'only known use' of a cancel, rare destinations or usages, will be highlighted with a dark red surround

The sender affixed 16c postage thinking it was a double rate cover weighing over 1/3 but less than 1/2 ounce which would have been the correct rate. However, it apparently weighed less than 1/3 ounce at the P.O. who rated it as a single rate cover giving a 4c credit to the US and 6c credit to Britain ('6' shown in the red Exchange Office datestamp). The correct postage due was therefore 10c making the cover 6c overpaid

It was then carried by Wells Fargo to New York where it entered the post office mail on the 6/3/1871. The 5c stamp paid the local Colonial rate to the border, and the U.S. 6c stamp plus the 6c entire paid the double 6c treaty rate U.S. to England. 8/29/1871 'paste back' 6c Wells Fargo Stamped Envelope from Vancouver Island, British Columbia, to England via New York

The earliest of 2 covers recorded with this cancel

The sender's letter was contained in a separately addressed envelope and pasted onto the rear of the stamped envelope, an accepted practice at that time.

There are two super-imposed sets of datestamps;

a) a red 'NEW YORK AUG 29' Exchange Office datestamp imposed on a similar black datestamp. This indicates that initially the NY Exchange Office thought it underpaid so used a black handstamp but reconsidered and applied the red handstamp showing it fully prepaid.

b) a large black datestamp 'LONDON E.C. SP 9 71' imposed on a smaller red 'LONDON SP8 71'. The red datestamp, applied by the London Foreign Office, indicated the envelope was received as prepaid. The black 'LONDON' delivery postmark was then struck co-incidentally over the red datestamp (these datestamps would normally be applied to the rear of the envelope).

The oval blue handstamp reads 'WELLS FARGO & CO - EXPRESS - VICTORIA ISLAND'. The 5 cent British Columbian stamp, affixed when the 6c Stamped Envelope was sold by Wells Fargo, prepaid postage to Great Britain. The sender paid, in cash, 20c or 25c for the Wells Fargo service.

C

10/9/1872 red **Supplementary Mail Type 'A'** to France

Of 46 covers recorded with this cancel this is the **earliest known use** (1872 backstamp), and one of only two known in red. **Extraordinarily, the next recorded use of this cancel is not until 25 months later on 11/14/1874 (see the cover to Russia at the top of 3-6).** One explanation might be this was a 'trial run' of a group of cancels prepared for the Post Office, another that the cancel was initially design purely for Supplementary Mail use before being brought into general use later. But if that was the case we might expect to see other uses prior to the next recorded Supplementary Mail use on 10/10/1874

The 9c prepayment appears two years before the 9c Treaty rate went into effect so it is assumed the postage paid equated to the 4c British Open Mail rate plus the 4c supplementary fee (with 1c overpaid)

Missing Type 'A' cachet

11/14/1874 to Nizni Novgorod, Russia

The only known cover recorded with a pair of 12c stamps

Although Nizni Novgorod is deleted, that is where it eventually arrived on 1/7/1875 (according to the backstamp)

Postage of 24c overpaid the double 11c Closed Mail rate of 22c by 2c

11/28/1874 to France

The cancel shows a total absence of the outer ring

The sender prepaid the 9c Direct Treaty rate, but actually sent at the 5c British Open Mail rate by British Packet to England only. '12' handstamp represents centimes to be collected from the addressee for carriage Britain to France

12/3/1874 **Supplementary Mail Type 'E'** to France

Postage of 18c paid the scarce 9c U.S.- French treaty rate plus the 9c Supplementary Mail fee

'Type E' Supplementary Mail was in recorded use 8/8/1874 to 3/7/1877 (31 known in black and 15 known in red)

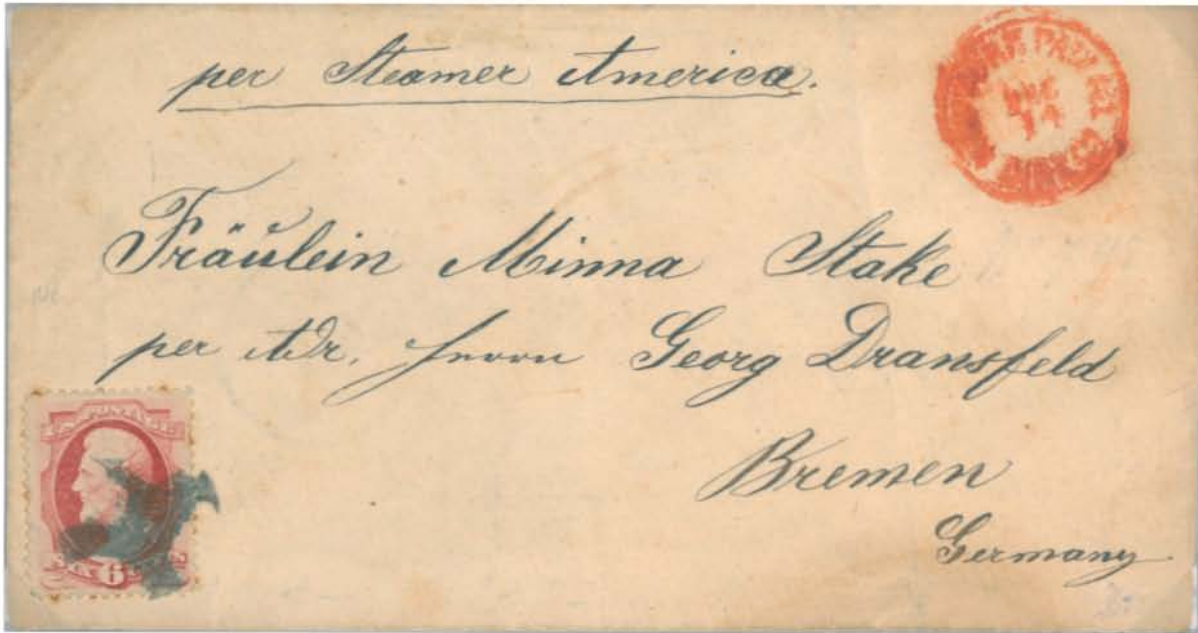

Note the inverted 'DEC' in the Exchange Office datestamp

An unusual NYFM cancel – being common in red and rare in black. An explanation might be that this cancel was possessed uniquely by the clerk who conducted the Supplementary Mail service who would use red ink as a matter of course

Postage of 20c paid the 10c Anglo-French (1869) and US-British (1870) convention rate plus the 10c Supplementary Mail fee

Postage of 24c paid double the 6c British Mail Treaty rate plus the 12c Supplementary Mail fee

From 7/10/1873 Supplementary Mail service at the dockside was discontinued. The service was only available from the main PO. During this period of transition type 'A' cachets can be found missing from other covers. Perhaps the handstamps were withdrawn in preparation for the introduction of the Type 'D' handstamp - or folk mistakenly continued to go to the dockside where a clerk remained - although without his type 'A' handstamp.

On that basis this cover would qualify as the last recorded use of Type 'A' Supplementary Mail usage.

8/27/1873 to France

Of more than 120 N.Y.F.M. covers recorded with this cancel this is the only known with a 15c Bank Note stamp

The sender affixed 16c postage thinking it was a double rate cover weighing over 1/3 but less than 1/2 ounce which would have been the correct rate. However, it apparently weighed less than 1/3 ounce at the P.O. who rated it as a single rate cover giving a 4c credit to the US and a 6c credit to Britain ('6' shown in the red Exchange Office datestamp). The correct postage due was therefore 10c making the cover 6c overpaid

Sent under the open mail provisions of the 1868 U.S/British Convention. The rate was 4c per half ounce, so postage paid of 6c was 2c overpaid. The cover was therefore more than fully paid to England. However the scarce 'PAID TO ENGLAND' Exchange Office datestamp indicates payment TO England, not THROUGH England. Britain sent the letter to France under the 1869 Anglo/French Convention. The London debited France 40 centimes per 30 grams bulk weight. France charged 10 decimes postage due, a double rate, indicating the letter weighed more than 10 grams, but less the half an ounce (approximately 15 grams)

INTRICATE FANCY CANCELLATION'S GOLDEN ERA

Intricate fancy cancellations peak at 23 new designs. Basic fancy, grid and wedge cancellations slump. However, from 9/12/1875, production of intricate fancy cancellations virtually ceases

Perhaps it was a combination of two factors;

- on 7/1/1875 provisions of the **General Postal Union** were introduced. Perhaps this was thought a suitable occasion for standardisation paving the way for the **inception of the steel ellipse**
- on 8/29/1875 the N.Y. P.O. commenced operations at **new purpose built City Park Hall premises**. Perhaps this was used as an opportunity to reorganise working practice

A latest and worn use of the righthand cancel

Initial postage of 11c (3 times 3c plus 2c stamp at the right) overpaid the 10c American Packer rate by 1c. The 1st NYFM cancel was applied before it transpired this was a double weight letter and 20c was due. So a red 'RETURNED FOR POSTAGE' was applied in New York and the letter returned to the sender, who then added 3 times 3c stamps, two at the left, and one at the left side of the 2c stamp on the right to complete the 20c required. The Foreign Mail Department then applied the 2nd NYFM cancel on the left. The handstamp '3' represents 3 Reales due on arrival

12 covers recorded with this cancel

Bears **mixed issue U.S. stamps**, 1869 2c stamp, 6 x 1873 10c stamps and 2 x Cuban 50 peseta stamps

Cuban stamps were required for Cuban postage even though the cover did not enter the Cuban postal system. U.S. stamps were not valid in Cuba, however, they were available through the U.S. consul to assist senders to prepay mail via, or through, the U.S.

The endorsement '*Via Estados Unidos*' translates '*Via United States*'. The endorsement beneath the top stamps reads '*Duplicate of letter sent 25th Feb 1875*'

The cover travelled by direct U.S. steamer from Havana to New York

U.S. postage paid double the 10c Steamship rate to the U.S. (to 1oz) plus the 32c British Open mail rate, via France to Spain, (half to two thirds oz), a total of 52c. The total of 62c was therefore 10c overpaid.

The only recorded Wells Fargo cover originating in Mexico with a NYFM cancel

The 3c Stamped Envelope was purchased at the Wells Fargo office in Mazatlan. The sender attached a 3c stamp to make up the 6c rate to Britain. Wells Fargo Mexican Coast and California Express fee for private, out of the mails carriage, was 35c, so we might assume the sender paid 6c in postage and 29c in cash. The sender's letter was contained in a separately addressed envelope (shown below) pasted onto the rear of the Stamped Envelope

The blue 'WELLS FARGO & Co. MAZATLAN MEX' and 'PAID' handstamps were applied in the Mazatlan Wells Fargo office

'Let each Nation adopt the inter-convertible bond system suggested by Horace H. Day of New York .. these (bonds) take the place of gold in all transactions.... No banks are necessary... LEAVING NEW YORK CITY BY TRAIN RATHER THAN SHIP VIA NEW ORLEANS

5/1/1875 to Mexico via New Orleans
The earliest recorded use of this cancel on cover

Most mail for Mexico left New York by ship South to Vera Cruz and thence onward. However, 4 covers are recorded endorsed 'Via New Orleans'. It is assumed these covers left New York by train for New Orleans, thence onto Vera Cruz by ship (mailship service commenced New Orleans to Vera Cruz Oct 1874) This cover arrived May 12th taking 11 days.

Postage of 10c overpaid the 7c Land Mail rate by 3c (25 centavos due on arrival)

The 1868 Peru 1d green paid postage to the Peruvian exit port thence to Panama via British Packet where it was stamped with the British 3 line 'PANAMA 20 JAN 1876 TRANSIT'. The 1875 USA 5c paid Panama to New York via US Packet

The handstamp '12' (cents), equalling 6d, represents the British debit to the US for transit Peru to Panama. However, a depreciated currency handstamp 'Due 14 US currency' was applied because settlements with England were in Specie, or it's gold equivalent, while the US due was paid in depreciated currency. This increased the debit from 12 to 14

TRIPLE COUNTRY FRANKING

C

10/21/1877 from Callao, Peru, to New York via Panama

This circle of wedges, **the sole recorded**, is one of the last hand carved cancels to be recorded prior to the universal use of steel ellipse cancels in the Foreign Exchange Department

The only recorded example of a cover with a NYFM cancel where stamps from THREE different countries were affixed to prepay postage

The Peruvian 1876 grilled 10c green stamp and the G.B. 1873 6p grey were applied and cancelled at the British Post Office at Callao

The U.S. 5c stamp was also applied at Callao but was not cancelled until the cover arrived at the Foreign Exchange Department in New York

The Peruvian 10c stamp paid internally to Callao; the G.B. 6p stamp, Callao to Panama; the U.S. 5c stamp Panama to the U.S. (the reduced blanket ship rate effective July 1, 1875)
